

Hello children, we hope that you have had a lovely two weeks off. Our new topic is 'Coming at you with force!' which will mainly focus on the Romans in history and forces in science.

Here are this week's learning tasks. We hope that you enjoy completing them and we look forward to seeing your work. As well as these tasks, you can also access Doodle maths, Doodle English, Reading Plus, Times Table Rockstars and can practise your weekly spellings.

Task 1 History	<p>Enlisting in the Roman Army</p> <p>We are all going to become members of the Roman Army. Can you complete the ID card to become a Roman soldier?</p> <p>You may also want to practise marching around your garden to prepare yourself for your duties.</p>
Task 2 Vocabulary	<p>Kenning Poem - The Roman Soldier</p> <p>The poem lists many of the qualities needed to be a soldier in the Roman Army, but what do all of the words mean?</p> <p>Read through the poem and complete the vocabulary activities on the second page (there is a different sheet for year 3 and year 4 for this).</p> <p>This should provide you with detailed information about the different roles that the soldiers had to take on.</p>
Task 3 Maths	<p>Roman Numerals</p> <p>The numbers used in the Roman times are very different to our numbers. Take a look at the PowerPoint to find out more.</p> <p>Can you learn what they mean and use your understanding to complete the maths questions?</p> <p>Year 3 = Roman numerals quantity task and one of the Secret code activities</p> <p>Year 4 = Year 4 Roman numerals task</p>
Task 4 History	<p>Roman soldier dress up and label</p> <p>Roman soldiers have a specific uniform which is practical whilst also indicating their level of importance.</p> <p>Take a look at the Uniform PowerPoint for more information.</p> <p>Then cut out the clothes to add them to the soldier and use the information from the PowerPoint and any other research that you would like to carry out, to correctly label the different parts of the uniform.</p> <p>There is a separate activity sheet for year 3 and year 4 for this task.</p>

<p>Task 5 Writing - persuasion</p>	<p>Persuasive army recruitment poster The Roman Legion recruited men from across the world to serve in their army. Your job is to create a poster that will persuade them to join.</p> <p>Task 1 Look at the examples of the recruitment posters. How much information do they give you? How do they make you feel? Which do you feel is the most persuasive and why? Can you rank the posters in order from the least to the most effective?</p> <p>Task 2 Complete the recruitment poster-planning sheet. You can use the information that you gained from the poem, uniform task and any research that you would like to carry out to help you. Remember when persuading, you need to make the soldiers feel empowered, motivated and as though joining the Roman Army is the best possible decision that they could make whilst still including accurate information.</p> <p>There is an imperative verbs PowerPoint to help you with this section of the plan.</p>
<p>Task 6 Writing - persuasion</p>	<p>Recruitment poster</p> <p>It is now time to use the poster examples and planning that you did yesterday to create your persuasive recruitment poster. Try to make the poster colourful and eye-catching. You will need to include all of the different aspects from the plan but remember to keep it short and snappy with little bits of information spread out across the page.</p>
<p>Optional extra challenge Science</p>	<p>In science this week, we are investigating magnets.</p> <p>If you have magnets available in your home, investigate the different things that they are attracted to (will stick to). Create a list of these. Do you see any similarities between the different objects?</p>
