VE DAY PARTY!

You are going to organise a party to celebrate the anniversary of VE Day.

Every person that attends the party will need food, drink and at least 1 decoration or souvenir. You have a budget of £8 per person.

Task 1: Please list the items that you would buy for each person in your family and then total the amount that it would cost altogether.

Task 2: A large family of 10 is also having a celebration.

Each person at the party would like:

- A sandwich
- A packet of crisps
- A biscuit
- A bun
- Lemonade
- A flag
- A balloon

Please calculate how much it would cost for one person to have these things and also calculate how much it would cost for all of the ten people.

Challenge:

If each person paid for their own things with a £10 note how much change would they need?

Can you draw out 3 different ways that you could give their change with coins?

FOOD & DRINK COSTS
