

States of Matter

Solid liquid gas

Solid liquid gas

Three states of matter

Solid liquid gas.

A solid keeps its shape

Some are hard, some can break

Like a table or a roll of tape

A solid keeps its shape.

A liquid's shape depends

On the container that it's in

Like a cup, bottle or metal tin

A liquid's shape depends.

A gas you cannot see

It's in the air that we breathe

Helium, oxygen or steam

A gas you cannot see.
